ABOUT US:-

Shree Jalaram Plywood being one of the forerunners in the business has always provided the cutting edge and leading production of the plywood and its related products in the Indian market. The company has built a sustainable relationship between the demand and supply which has been delighting the customers as well as the redistribution channels and the suppliers. It would not be at all wrong to say that our company has been nicely keeping up with the modern need and quality since the time we have started.

THE STORY SO FAR:-

Our story at Shree Jalaram Plywood started way back in 1944 with a small saw mill under the soulful guidance of our bearer and mentor, Tejalal L. Patel. After the start up, things were smooth but that dream to touch the skies' limit was still in making. And as it is said that, "Success is never a dream for hard workers," the year 1987 proved as a milestone in the Golden History of that small saw mill. In this year, our company started manufacturing the Core Veneers at Forbisganj and the success took the next level as the expansions in Madhya Pradesh and Bihar. But the final destination was not reached because it was mended for Gujrat. And soon, we were an excellent plywood manufacturing company in Mehsana, Gujrat.

VISION:-

It has always been our vision that is making us stand apart in our services because Shree Jalaram Plywood has always wanted to grow up as a wood-based company to manufacture the finest quality of products.
